

About VacCalendar App

VacCalendar is a free, easy-to-use mobile app designed to help parents and caregivers manage their child's vaccination schedules. With features like personalized reminders, health education on vaccines, and an online and offline mode, the app makes staying on top of your baby's vaccination needs simple and stress-free.

Key Features:

Personalized Vaccination Calendar: Enter your child's birth date to generate a recommended vaccination schedule based on guidelines provided by your local RHU (Rural Health Unit). You also have the flexibility to manually input vaccination dates or customize the schedule according to your preferences.

Alarm and Notification Reminders: Get timely reminders for upcoming vaccinations, so you never miss an important date.

Health Education: Learn about the importance of vaccines, common side effects, and answers to frequently asked questions—all within the app.

Online and Offline Access: VacCalendar offers both online and offline modes, ensuring you can use it anytime, anywhere. Minimal data usage applies when online.

Completely Free: Enjoy all features of the app for free—no hidden charges or in-app purchases.

VacCalendar is committed to protecting your privacy. The app operates in compliance with the **Data Privacy Act of 2012**, ensuring that your personal information and vaccination records remain secure and confidential.

Stay organized and take the guesswork out of tracking your child's vaccinations with **VacCalendar**.
